## **Transportation Update- November 22, 2021**

### **General Information**

#### **Committee\Council Approvals**

- Three Rivers Phase 3 – Approved by Council on 11/9
- Mitigation Credit Sales: Amick Farms Rail Upgrade in Saluda County – Approved by Committee 11/18
- Mitigation Credit Sales: Quick Trip Store in Lexington County – Approved by Committee 11/18

#### **Upcoming Committee\Council Items**

- Mitigation Credit Sales: Amick Farms Rail Upgrade in Saluda County – Council 12/7
- Mitigation Credit Sales: Quick Trip Store in Lexington County – Council 12/7

#### **Pre-Construction Update**

- Atlas Rd. Widening – OET is working to address final plan comments from SCDOT.
- Blythewood Rd. Widening – ROW on all but four properties has now been obtained. There is some final coordination to perform on the Town of Winnsboro waterline.
- Bull\Elmwood Intersection – We are waiting on final utility coordination on one Dominion light pole. Once this is complete the bid documents can be finalized and the project advertised.
- Dirt Road Paving
  - Package M –bids were received on 11/9/2021. This will include the following roads: Bow String Rd., Maggie Hipp Rd., Rosa Dowdy Rd., and Tall Oaks Dr. Procurement is in the process of reviewing the bids.
  - Package N is being finalized and is anticipated to be advertised this winter. This will include the following roads: Larger St., Nathan Ridge Ln., Sara Matthews Rd.
- Garners Ferry\Harmon Intersection – All utility coordination that needs to occur before construction has been completed. Dominion and CenturyLink has already performed their relocations. Charter, and Segra are finalizing their plans and will performing their own relocations. The OET is finalizing the bid package and updating the cost estimate for advertisement.
- Lower Richland Blvd. Widening – The OET was asked to update the traffic study for this project due to the recent construction of a new gas station at the intersection with Garners Ferry Rd. The new rescope approved by Council on Oct. 5<sup>th</sup> includes widening the road to 5 lanes from Garners Ferry to the Sheriff's Substation, widening to 3 lanes from the Substation to Rabbit Run, and installing a roundabout at the intersection of Lower Richland and Rabbit Run.
- Shop Rd. Widening – A new service order modification has been executed with the OET. This work covers the analysis of existing drainage between George Rogers Blvd. and Rosewood so that the existing drainage issues in the area can be taken care of without discharging into the railroad ROW.

- Spears Creek Church Road Widening- A Public Input Meeting was held October 14<sup>th</sup> at Pontiac Elementary School. Citizens who would like to provide comments have until November 14<sup>th</sup> to do so.

### **Construction Update**

- Innovista Phase II- Approximately 66% complete. Completion estimated for May 2022.
- North Main Street – Approximately 96% complete. Due to an unforeseen issue at the intersection with Monticello Rd., a significant rework of the area now has to be completed. We will need to submit to the City for additional funding for this change.
- Three Rivers Greenway Ph. 1B – The coffer dam has been installed and construction has begun.
- Dirt Road Package K- Approximately 64% complete. There was a temporary delay on this project due to several contractor crew members testing positive for COVID.
- Resurfacing Package R- Approximately 8% complete.
- Clemson Rd. Ph. 1 Sidewalk – Construction began mid-July and is approximately 60% complete.
- Old Garners Ferry Rd TIP 2 – Approximately 5% complete.

### **Open Solicitations:**

### **Upcoming Solicitations:**

- Alpine Road Sidewalk- Winter 2021\2022
- Percival Road Sidewalk: Winter 2021\2022
- Sunset Drive Sidewalk: Winter 2021-2022
- Atlas Road Widening Phase 1: Winter 2021\2022
- Garners Ferry\Harmon Intersection: Fall 2021
- Bull\Elmwood Intersection: Fall 2021
- Blythewood Widening: Winter 2021\2022
- Dirt Road Package N: Winter 2021\2022

SUBJECT: The COMET – Planning Activities Update

---

Over the past couple of months, The COMET has focused its planning efforts on adjusting to the “New Normal” of transit. The following planning activities from 08/30/2021 through 09/27/2021 are listed below:

- Completed OpSTATS Report
- Started QA checking Service Route Analysis for public distribution
- Coordinated with UofSC for budget revisions
- Met with Coalition of Downtown Neighborhoods
- Revisited Swiftly Training Module
- Continued the schedule auditing process with Swiftly
- Interviewed with Chatham Area Transit to provide feedback on Uber & Lyft services
- Met with Thomas Kowalski from Urban Transport Associates to discuss training plans and staff system access
- Conducted site plan reviews
- Continued work to install advertisement benches throughout service area
- Continued verifying turn-by-turns in Remix with Strategic Mapping Dispatch Portal
- Sent draft of LEP signage for areas with high concentrations of LEP individuals
- Verified UofSC schedules to ensure that internal and public facing schedules match

## Reimagine The COMET

- The COMET officially launched the Reimagine The COMET planning effort on July 6, 2020 where local planners and staff representatives discussed community needs for transit. Elected officials were welcomed to join a daily 4 p.m. call to provide any additional feedback.
  - Using the project timeline listed below, The COMET is in the final stages of the public outreach phase. The Reimagine The COMET website was released to the public on September 1, 2020.
  - JWA is in the process of receiving input from the Board of Directors.
    - The board voted to design service to support 60% ridership and 40% coverage.
      - The COMET is now preparing to meet with City of Columbia to discuss next steps and how to incorporate Lucius & River SuperStop.
  - Online survey remains open to the public for feedback until further notice.

## Project Timeline

Will Brennan, Stephen Cain, John V. Furgess, Sr., Carolyn Gleaton, Mike Green, Leon Howard, Skip Jenkins, Al Koon, Lill Mood, Robert Morris, Geraldine Robinson, Debbie Summers, William (B.J.) Unthank, Barry Walker, Overture Walker

**WORK COMPLETED THIS PERIOD:**

- Site Designs, Status Reports, Effort Review, and Project Management
- Designing and permitting priority bench sites as designated by COMET.
- Bi-Weekly Meeting with Eric Harris/Blake Gibbons to discuss new work requests and review pending questions needing COMET input

**WORK IN PROGRESS:**

- AOS has the following stops under construction (13): Stop #1186 Assembly Flora SB(under legal review), Stop #772 Beltline Withers SB (awaiting amenities order), Stop #1292 Garners Atlas EB(awaiting amenities order), Stop #349 Gervais Oak WB(awaiting amenities order), Stop #409 Two Notch Polo NB(awaiting amenities order), Stop #410 Two Notch Evergreen NB(awaiting amenities order), Stop #752 Laurel Henderson WB(awaiting amenities order), Stop #1038 Forest Lakeshore WB(awaiting amenities order), Stop #1095 Harden Gervais SB(awaiting amenities order), Stop #1561 Parklane Two Notch NB(awaiting amenities order), Stop #324 Wilkes Main NB (awaiting amenities order), Stop #7616 Fort Jackson Gate 2 (awaiting amenities order), Stop #1236 VA Hospital (awaiting amenities order)

**UNRESOLVED ISSUES:**

- Stop 1224 Main Confederate SB – Property owner is installing fence that will cause the removal of a bench that property owner previously placed for use by COMET passengers. Property owner is requesting COMET to provide bench at this location.

**PENDING ITEMS REQUIRING CLIENT ACTION:**

- Shelter and bench inventory is needed for 13 sites to be completed

TO: Central Midlands Regional Transit Authority Board of Directors

FROM: LeRoy DesChamps, Interim Executive Director

SUBJECT: Service Route Analysis FY 2021

---

**Requested Action:** Staff recommends that the Service Committee review The COMET's Service Analysis.

**Background and Summary:** The Service Route Analysis was created in an effort to become more aligned with the interest of the community. Trying to determine whether to focus more on coverage area or ridership is often the challenge many transit agencies have to face, but through this report, the Service Committee will have an opportunity to find the balance between the two concepts.

The attached report observes service routes provided by the COMET in from FY 2019 through FY 2021. All data provided was delineated into a route profile where it was reviewed through performance indicators and compared to annual data.

Information within the Service Route Analysis will be modified as needed. Because the report is focused on performance, the data is presented by fiscal year (FY).

The COMET Service Route Analysis is made up of elements required by NTD that includes:

- Yearly Ridership Data
- Rural Route Data
- Revenue Hours
- Revenue Miles

Staff is presenting the draft Route Analysis for Service Committee's review. This report will help guide The COMET through its long-range plan, "Reimagine The COMET" and shall be updated yearly and presented to the board.

**Fiscal Impacts:** None.

**Legal Counsel Review:** None.

Recommended Motion: That the Board of Directors finalize approval of the 60% ridership and 40% coverage concept recommended from the "Reimagine the COMET" Choices Report.

# System Performance Summary Analysis

## System Performance Summary for FY 2019 – 2021

This report provides a detailed analysis of service routes provided by The COMET from FY 2019 to FY 2021. The results from this data will be used to modify services to better support the needs of the community.

There are three primary performance indicators used in this report:

**Ridership** – The number of passengers that enter a transit vehicle during service hours.

**Service Route Rankings** – This is a true efficiency analysis aggregated by population within a 3/4 mile radius of a service route divided by average fiscal year ridership. The higher the number, the more efficient the route. The lower the number, the least efficient the route. This data metric should be used with caution for routes exclusively serving a central business district.

**Boardings Per Hour** – The average number of riders boarding a given transit bus within one hour of service. This data will provide insight of the hourly load that each route is carrying. Due to the elasticity of this performance measurement, this should not justify the removal of a route, but changes in the frequency or times of a route.

### Ridership Trends

In FY 2021, 23% of service routes increased in ridership. Through the analysis, it was found that a surge in weekday ridership is merely associated to overall service performance. In other words, there was 20% of service routes with an increase in weekday ridership. As for Weekend service level, both Saturday & Sunday services increased by 40%. Despite the improvement, the entire system has not mirrored the same performance. 77% percent of all service routes are down in ridership, with limited growth throughout rural areas; route 97 (Batesburg-Leesville) remains the anomaly.

Considering some routes returned to service at various parts of the year, the pandemic analysis, delineated by service tiers, shows ridership trends from January 2020 to June 2021. In the 3/4<sup>th</sup> mile radius from a fixed route, COMET Central to Broad River/Harbison corridor are shown to be the most highly concentrated areas in ridership improvement. This is further shown in other urbanized areas such as Two Notch, Sandhills, North Main, and parts of West Columbia.

To date, The COMET has mitigated some of the service impacts by planning around Reimagine The COMET, long-range plan. It was recommended by the Board of Directors to implement a system revamp with interest of 60% of service to be ridership incentivized and the remaining 40% catering to coverage opportunities. This effort would help to reduce service cost, which was one of the objectives of last years' Service Route Analysis and design a system dedicated to modern community needs.

Reimagine The COMET

In FY 2021 the following activities were completed:

- **1st Quarter (July 2020 - September 2020)**
  - RATPDEV was named operations contractor
  - Start of agreement to operate UofSC service routes
  - Welcomed Strategic Mapping as new AVL system
- **2nd Quarter (October 2020 - December 2020)**
  - Held public meetings for service changes
  - Aligned service plans with Reimagine The COMET
  - Explored on-demand service opportunities in low performing areas
  - Verified data from automatic passenger counters (APC) to meet federal regulations and to encourage a seamless integration with Strategic Mapping
  - Conducted traffic analysis for Lucius & River SuperStop
- **3rd Quarter (January 2021 - March 2021)**
  - Experienced reduction in bus operators
  - Revested plans to implement microtransit in Irmo, Pontiac and Lake Carolina
  - Finalized plans for Lucius & River SuperStop service redesign
  - Completed public meetings for Reimagine The COMET
- **4th Quarter (April 2021 - June 2021)**
  - Implemented service changes by part of FY20 Service Route Analysis
  - Started OTP improvement process and continued software integration with Trillium, Remix, Solutions for Transit, and Strategic Mapping

#### FY 2022 Performance Outlook

**Aggressive prediction:** 40% increase in ridership contingent upon the implementation of Reimagine The COMET, increased service reliability, marketing, and COVID-19 restrictions.

**Moderate prediction:** 30% increase in ridership contingent upon the implementation of Reimagine The COMET and extent of COVID-19 restrictions.

**Low prediction:** 20% increase in ridership contingent upon COVID-19 restrictions.

# Service Route Rankings

Rankings	Service Routes	Population 3 Quarters of Mile	Percentage of Population Served

# Memo

**To:** Central Midlands Transit Authority Board of Directors  
**From:** Scudder Wagg, Jarrett Walker + Associates  
**Date:** March 18, 2021  
**Subject:** Summary of Concepts and Ridership-Coverage Policy Decision

As part of Short Range Transit Plan, The COMET is considering a full redesign of the bus system. An analysis of the existing network, demographics, and land use in the region was conducted to assess the markets and needs for transit within the Central Midlands Region. This analysis was summarized in the [Choices and Concepts Report](#).

A key question in this process is how The COMET should balance the competing goals of **Ridership** and **Coverage**.

- A high **ridership** network allocates frequent service to areas with favorable urban development patterns, forming a connected network and leads to many people having quick and easy access to most of the region, so that the high ridership network can also be described as the highly useful network.
- If The COMET were pursuing only **coverage**, meaning getting a little bit of service to everyone, it would spread out transit service so that every neighborhood and town had some service. All routes would then be infrequent, even on the main roads, and therefore most service would be less useful for getting places in a reasonable amount of time. A transit agency can pursue ridership and provide coverage within the same budget, but not with the same dollar. The more it does of one, the less it does of the other.

To help everyone better understand how this trade-off would affect The COMET service, our team, in collaboration with The COMET and local jurisdictions staff, developed two "Network Concepts" that show everyone how a higher ridership or a higher coverage network might look in the Central Midlands and what outcomes each might achieve. These concepts are just that, concepts, meant to facilitate conversation and understanding of how different choices would result in different transit network designs and each are compared to the Existing Network, which puts about 45% of resources toward ridership goals, and 45% toward coverage goals, and 10% in duplication.

The two network concepts are:

- Coverage Concept: This concept shifts more resources toward coverage of places and streets, putting 50% of resources toward ridership goals, and 50% toward coverage goals.
- Ridership Concept: This concept shifts more resources toward ridership goals, putting 80% of resources toward ridership goals, and 20% toward coverage goals.

Maps of the two concepts are available on the Reimagining The COMET webpage: <https://reimaginethecomet.org/>.

## Measures of Success

In comparing the two networks, it is critical to keep in mind how they differ in outcomes on the two primary measures of success:

- Proximity to service: how many people or jobs are near service, no matter how frequent. This measure aligns with higher coverage goals.
- Usefulness of service: how much access to opportunity the network provides. This measure aligns with higher ridership goals.

### PROXIMITY TO SERVICE

The number of people and jobs within a certain distance from transit is the simplest measure of transit outcomes. Many people have varying levels of willingness to walk to transit, but most research shows that most people are willing to walk up to ¼ mile to reach a transit stop.

The bar charts on the following page show how many residents and jobs in Richland County would be “close enough” to frequent (i.e. 15-minute) service, 30-minute, or 60-minute transit service for the Existing Network and the Coverage and Ridership Concepts. These charts assume that someone is near transit service if they are within ¼ mile of a bus stop as the crow flies. Walking ¼ mile over flat ground takes the average person about 5 minutes.

Today, 35% of residents are near transit service and in the Coverage Concept that would decline slightly to 31%, but more of those residents would be near 30-minute service. In the Ridership Concept, the percent of residents near service declines to 21%, but of those, 8% would be near frequent transit. So the trade-off for the Ridership Concept is that while fewer people are near service, those that are near service have relatively high frequency service.

For jobs, in today’s network, 55% of jobs are near some service, with 33% near 30-minute service. In the Coverage Concept this declines slightly to 51% of jobs, but more of those jobs (36%) would be near 30 minutes service. In the Ridership Concept fewer jobs are near any service, with only 44% near some service, but many jobs are served by high frequency service, with 29% of jobs near a bus route coming every 15 minutes.

Figure 61: Proximity to Transit for Residents and Jobs in Richland County in the Existing Network and Both Concepts

The bar charts on the following page show the same proximity analysis for Lexington County. Today very few people in Lexington County are near transit service at all mostly because there is very little transit service in the County. The County and municipalities within it provide very little funding for service and such limited resources can reach only a few people. Since there is so little service to adjust, the Ridership and Coverage Concepts are only marginally different in Lexington County.

The Coverage Concept does not substantially change how many residents or job are near transit, leaving only 9% of residents and 22% of jobs with service and mostly hourly service.

In the Ridership Concept, the percent of residents near service declines slightly to 7% and the percent of jobs near service declines slightly to 21% since Routes 83L, 91, 96L are simplified. Yet the percent of people near 30-minute service increases from 1% to 3% and the percent of jobs near 30-minute service increases from 1% to 7% with the Ridership Concept.

Figure 63: Proximity to Transit for Residents and Jobs in Lexington County in the Existing Network and Both Concepts

## USEFULNESS OF SERVICE

People ride transit if they find it useful. High transit ridership results when transit is useful to large numbers of people. A helpful way to illustrate the usefulness of a network is to visualize where a person could go using public transit and walking, from a certain location, in a certain amount of time.

The maps in the figure below show someone's access to and from the Downtown Columbia in 45 minutes, at noon on a weekday in the Ridership and Coverage Concepts. Each concept is compared to the Existing Network. The technical term for this illustration is isochrone. A more useful transit network is one in which these isochrones are larger, so that each person is likely to find the network useful for more trips.

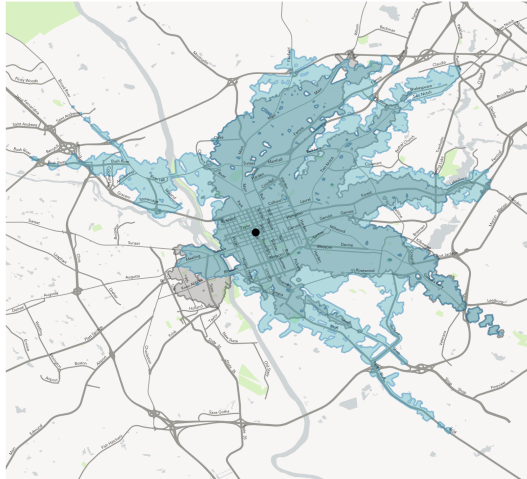

The dark blue represents areas that are reachable today and would remain reachable in the corresponding concept. Areas that are newly reachable are shown in light blue, and areas that would no longer be reachable are shown in gray. The maps show that for trips beginning in Downtown Columbia, the Ridership Concept would increase access to residents and jobs over the existing network by over 17%. The Coverage Concept would slightly increase access to jobs by 7.5%. We measure the jobs and people you can reach in these isochrones because it is not just the area you can reach that matters, but what is in that area: the job opportunities, the shopping destinations, the medical facilities. The

total number of jobs reachable is a key proxy for all of those things that are important to reach by transit.

How far can I travel in 45 minutes from  
Downtown  
at noon?

## Ridership Concept

	Change	Change %
Jobs Accessible	+14,530	+17.0%
Resients Accessible	+19,960	+31.0%

## Coverage Concept

	Change	Change %
Jobs Accessible	+6,400	+7.5%
Resients Accessible	+6,450	+10.0%

### CHANGE IN JOB ACCESS

By adding up all the increases and decreases in job access across the region for each concept and weighting those changes by population, we can estimate how each concept changes the access to jobs for the average person. The chart below shows that today, the average Central Midlands resident can reach 13,000 jobs by walking and transit in 45 minutes. The Coverage Concept would increase this by 7%. The Ridership Concept would dramatically increase the number of jobs reachable in 45 minutes to over 20,000, a 59% increase. It does this by reducing waiting time with higher frequency service in the busiest areas of the region.

These are the basic trade-offs in outcomes between a higher coverage system and a higher ridership system. In a higher coverage system, more people and jobs are near some service, but more of that service is infrequent and less useful. In a higher ridership system, a smaller percentage of residents and jobs are near any service, but far more are near frequent and useful service.

## **Public and Stakeholder Engagement**

The consultant team and The COMET staff actively engaged the public from November 2020 through January 2021 to ask riders and the general public which of these concepts they preferred. People were encouraged to take the online survey, or take a paper survey at in-person tabling events.

The COMET and consultant staff did interviews with local media to spread the word about the concepts and the project and ask people to take the online survey. Media coverage included

- WOLO,
- WIS News 10 Sunrise,
- WLTX,
- Cola Today Online Publication,
- SCETV Public Radio, and
- Onpoint! with Cynthia Hardy.

The team held a pair of stakeholder meetings with more than 20 representatives of key stakeholder groups across the region on November 10<sup>th</sup> and 12<sup>th</sup>. We held two virtual town hall meetings on December 2<sup>nd</sup> and 9<sup>th</sup> with about 20 total participants. The consultant team held seven tabling events at The COMET Central and other key transit stops in December and January. This effort resulted in 352 survey responses.

On the question of which network concept they preferred, survey respondents were split. About 33% strongly preferred the Coverage Concept, 11% leaned toward the Coverage Concept, 11% were halfway in between, 13% leaned toward the Ridership Concept, and about 30% strongly preferred the Ridership Concept.

## Q1 Which concept do you prefer?

The result above suggests a wide variance in the opinion of respondents on the question of whether to pursue a higher ridership or a higher coverage network design.

The survey also asked respondents if they preferred a shorter walk with a longer wait or a longer walk with a shorter wait. The first option is more like a high coverage network. The second option is more like a high ridership network.

## Q2 Walking vs. Waiting

On this question, a majority of respondents said they would prefer a longer walk with a shorter wait, the more high ridership option. Still, about 40% said they would prefer a shorter walk, even if it meant a longer wait, which is a high coverage approach.

### What are the next steps?

The question of how to balance how The COMET investments in bus service between Ridership goals and Coverage goals is a value question about what The COMET and its partners want to prioritize. As such, it is best left to policymakers to decide the answer. The public input from the survey provides some perspective on what existing riders and the general public think, but as the appointed representatives of jurisdictions who fund The COMET, the Board of Directors is the body empowered to decide these key value questions.

The decision spectrum can be imagined as a range between higher coverage and higher ridership, as shown below.

A recommended policy resolution is provided on the following page where the Board can add its preference for the percent of the budget that should maximize ridership and the percent that should maximize coverage. Once the Board has made its decision on this key value choice, The COMET and consultant staff can proceed with developing a draft recommended network and complete the Short Range Transit Plan process.

## **Recommended Policy Resolution regarding the balance between Ridership and Coverage Goals for The COMET**

---

WHEREAS, The COMET, in partnership with the Central Midland Council of Governments, the City of Columbia, and other regional partners has engaged in a Comprehensive Operations Analysis and Short Range Transit Plan process called Reimagine The COMET to study the entire transit system in the region and recommend changes to better align the transit system with the values and goals of the region; and

WHEREAS, The COMET, through Reimage The COMET, has studied the existing transit system, existing transit ridership patterns, population, employment and other demographic patterns and has distilled the major trade-offs and challenges with the existing transit system into a “Choices and Concepts Report”, published in November 2020; and

WHEREAS, transit operations can serve many goals, but within a finite budget certain of these goals come into conflict with one another and in particular the goals of maximizing ridership and providing broad geographic coverage come into conflict; and

WHEREAS, The COMET created two transit network concepts to help the general public, stakeholders and elected officials visualize how different goals would result in different transit system designs and has discussed these different concepts with the general public, key stakeholders and elected officials; and

WHEREAS, The COMET has surveyed existing riders, the general public and key stakeholders about their preferences with respect to the goals of maximizing ridership or providing broad geographic coverage.

NOW, THEREFORE,

BE IT RESOLVED BY THE BOARD OF DIRECTORS FOR THE CENTRAL MIDLAND TRANSIT AUTHORITY:

That The COMET balance the goals of ridership and coverage deliberately within its operating budget for transit services and that the achieved balance will be that \_\_\_% of the transit operating budget is spent to maximize ridership relative to cost, while \_\_\_% of the transit operating budget is spent covering places where ridership is low but other values, such as equity and need, justify the provision of service.
